6.1.1: The Institution has clearly stated vision and mission which are reflected in its academic and administrative governance.

The vision and mission of an institution serve as guiding principles that shape its academic and administrative governance, providing a clear direction for its activities, goals, and values. When these elements are well-defined and effectively communicated, they become the foundation upon which all decisions and actions are based. Let's delve into how a clearly stated vision and mission influence academic and administrative governance within an institution.

Vision Statement:

A vision statement outlines the future aspirations and goals of the institution. It encapsulates the ideal state that the institution aims to achieve, inspiring stakeholders and guiding strategic planning.

"Dr. Ulhas Patil Homoeopathic Medical College and Hospital aim to be the pioneer institution to impart en-par excellent education and provide faculties for research, so as to develop Homoeopathy as such in the region, which will in turn render excellent medical care for the benefit of society, by the dint of producing outstanding graduate and post graduate students."

Mission Statement:

The mission statement defines the purpose and core values of the institution, clarifying its reason for existence and its commitment to stakeholders. It sets the tone for day-to-day operations and decision-making.

"Mission of the institute is to produce out going homoeopathic doctors who will get excellent teaching and research facilities, who will not only preserve and generate knowledge built also enhance human resources to improve quality of life, contribute to national development, and upliftment of Homoeopathy."

Influence on Academic Governance:

1. Curriculum Development: The vision and mission guide curriculum design, ensuring alignment with institutional values and goals. Programs are developed to meet the needs of students and the demands of the changing global landscape.
2. Faculty Recruitment and Development: Academic governance involves decisions regarding faculty hiring, tenure, and professional development. The vision and mission serve as criteria for

evaluating candidates' alignment with institutional values and their potential to contribute to the mission.

3. Research Prioritization: Academic governance includes setting research priorities and allocating resources. The vision and mission inform decisions about which areas of research to prioritize based on their relevance to institutional goals and societal needs.

4. Student Support Services: The institution's commitment to inclusivity and student success influences the development of support services such as counseling, tutoring, and career guidance. These services are designed to help students thrive academically and personally.

Influence on Administrative Governance:

1. Strategic Planning: The vision and mission guide the development of strategic plans, outlining objectives and initiatives to advance the institution's goals. Administrative governance involves decision-making related to resource allocation, infrastructure development, and organizational structure.

2. Budgeting and Resource Allocation: Financial decisions, including budgeting and resource allocation, are informed by the institution's priorities as outlined in its vision and mission. Funds are allocated to initiatives that support the core values and goals of the institution.

3. Policies and Procedures: Administrative governance involves establishing policies and procedures that govern various aspects of institutional operations. These policies are developed with the vision and mission in mind, ensuring consistency with institutional values and goals.

4. Stakeholder Engagement: The institution's vision and mission guide efforts to engage with stakeholders, including students, faculty, staff, alumni, and the broader community. Administrative governance involves fostering meaningful relationships and partnerships that support the institution's mission and enhance its impact.

In summary, a clearly stated vision and mission are essential components of effective academic and administrative governance within an institution. They provide a shared sense of purpose, guiding decision-making and shaping the institution's culture and identity. By aligning policies, practices, and initiatives with these guiding principles, institutions can work towards achieving their long-term goals and making a positive impact on society.
