Best practice-1

1. Title of the practice – Enhancing clinical competence: Skill development for Homoeopathy students.

2. Objective of the practice

- To extend financial aid to the poor students specially from the rural to save them from the discontinuation of their studies going to poverty.
- To support financially all the deserving poor students without any discrimination of caste Creed or Gender and to promote equality among students.
- To provide hands-on training to students in currently used tools, techniques & clinical practice.

the expected outcome is that the student should be able to complete their degree with good marks the beneficiaries should treat the needy with the principal of Land of helping hand without discrimination

3. The context

most of the students have hidden talents and innovative mind but not able to execute due to lack of resources and financial support

on the same context the institute stood in front to support the student by providing them with the financial aid.

To ensure that future medical professionals are well equipped to meet industry demands it is imperative to integrate comprehensive & collaborative training programs that reflect current advancement & practice in medical field.

4. The practice

The institution is established in rural area to provide quality medical education to the student residing in rural areas and who want to pursue their graduation and postgraduation studies in medical science.

Most of the parents are not ready to admit their children in higher studies due to lack of sustenance in providing financial support, so it is evident that without financial support from external sources the youth residing in rural area cannot hope to successfully complete their higher studies.

Through this structured approach the institution aims to enhance the practical skills of medical students ensuring they are well prepared to meet the demands of healthcare industry.

On this regard the institution verified the information of the students.

5. Evidence of success
